1. Introduction

The complaint management policy (hereafter « Policy »), made by the Authorised Management, is defining the objectives and responsibilities in cases of complaints made by the customers.

This policy is based on the current regulatory framework regarding the handling of Customer's complaints, specifically with the framework put in place by **the CSSF regulation n° 16-07 as well as the CSSF 17/671 circular**.

It is approved by the Board of Directors.

It will be frequently updated so that it reflects the evolutions of the regulatory framework.

2. Definition of a complaint and policy's objectives

A complaint is the expression of a « complaint filed with a professional to obtain recognition of a right or to redress a prejudice ».

The materialization and the registration of a complaint are specified in the procedure.

The complaint management policy provides the framework for the Customer complaints system. The setting up of such a system aims to:

- the continuous improvement in the quality of services offered to Clients ;
- Customer satisfaction ;
- *identify and address any recurring or systemic issues, as well as potential legal and operational risks, for example :*
 - *by analysing the causes of individual complaints to identify the common origins of certain types of complaints;*
 - *by examining whether these origins can also affect other processes or products, including those on which complaints are not directly related; and*
 - *by correcting these origins, when it is reasonable to do so.*

This applies to all Customers (natural or legal persons) who have filed a complaint with our company.
